Compare quick care options to help keep costs down.

Call 911 or go to an emergency room (ER) if you have a life-threatening condition. For everything else, see your primary care physician (PCP) or family doctor first. If seeing your PCP isn't possible, it's important to know your quick care options, especially before heading to an ER.

Getting care at the best place for your condition could **save you up to $1,900 compared to an ER visit.** For more details on quick care options, visit **uhc.com/checkchoosego.**
